

# PROpilot pH Turboxy®

Finally, the chlorine level clearly displayed in mg / l (ppm) affordable.

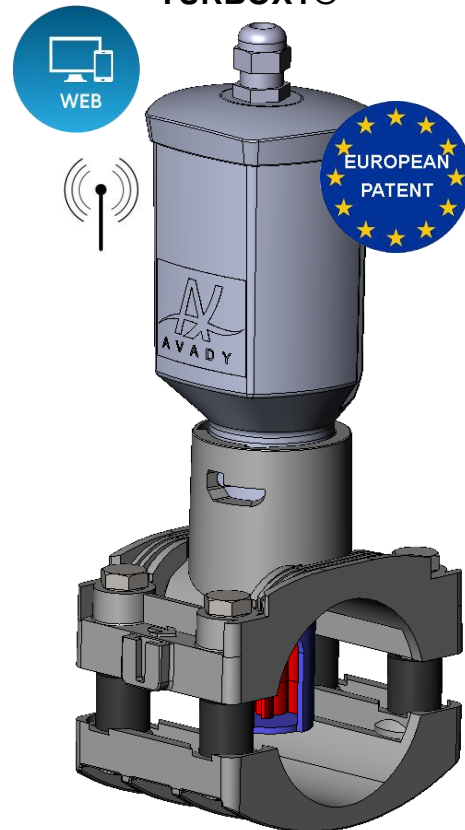

**Dosing the pH product :** it activates the built-in pump

**Dosing the chlorine :** it activates either a peristaltic pump or a solenoid dosing pump plugged on the PROpilot

## Free chlorine probe TURBOXY®

Direct installation on pipe DN 50 or DN 63

### INNOVATIVE

- Turboxy® plugged on the PROpilot will be connected to the internet without any configuration required during the installation. This set allows to know the global activity of the swimming pool water.
- Control of the pH, chlorine, temperature, flowrate, pH and chlorine product levels.
- Remote configuration available
- Direct power of the device through a wall socket without connection into the electrical box of the swimming pool.

### MULTIPURPOSE

- Compatible with the presence of stabilizer in water, 0 to 50 ppm
- Designed for private or public pools
- Built-in pH pump\*:
  - 1,5 l/h → private : up to 150m<sup>3</sup>  
public : up to 100m<sup>3</sup>
  - 3 l/h → private : up to 280m<sup>3</sup>  
public : up to 180m<sup>3</sup>
- Chlorination : choose the external dosing pump corresponding to the pool size.

### SECURE

- Detects the lack of flow in the pipe
- Volumetric alarm avoiding emptying of the chemical tank
- Adjusts the dosing depending on the pH and chlorine chemical needs

\* incompatible with hydrochloric acid
