

# ChloriProtect®

Private  
pools

Ensures safe chlorine production by the electrolytic salt cell and protects bar-supported covers

- Live display of the **chlorine content** in mV

- Adjustable electrolytic salt cell cut-off limit

- Optimal dosage:  
Control of the electrolytic salt cell to prevent over-chlorination  
Protects equipment (e.g. bar-supported covers, blinds and liners.)

## SIMPLE

- Optimum ease of use: one function per button

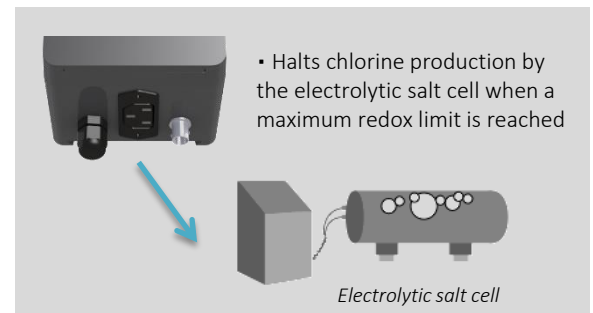

## SAFE

- The control output is protected against overloads by a 3 A fuse (max. 700 W).
- The difference in mV between the electrolytic cell start and stop is adjustable.

## WARRANTY

- Device: two years

- Supplied with a **complete kit** for quick and easy installation:

- Halts chlorine production by the electrolytic salt cell when a maximum redox limit is reached
