

Dominique Ducœur
Director of Avady

With some 30 years of experience in water treatment measurement and monitoring, Dominique Ducœur applies his skills and know-how to devise and design the equipment best suited to automatic swimming pool water analysis systems.

“At Avady, we draw on our proven experience to devise products with the capabilities needed and requested by individuals and professionals. We create products to make life easier for pool users, while ensuring that our systems are quick and straightforward for our installers to set up.”

Water treatment equipment
for pools and spas,
made in France

Water treatment with total peace of mind

Avady devises, develops and assembles water treatment equipment that provides practical, unique and innovative solutions for all market sectors. We are committed to providing high-quality, state-of-the-art equipment that is easy to install and use, to ensure that all users obtain the performance they need.

POOLeasy® pH ou Rx
Automatically regulates pool pH or chlorine levels. The volumetric alarm ensures that chemical containers never run dry. Features a two-in-one injector sensor holder, for horizontal or vertical installation. Fits 50mm and 63mm diameter pipes.

ChloriProtect®
Measures the chlorine concentration in pools. Controls the electrolytic salt cell to avoid excess chlorine levels; protects equipment such as bar-supported covers, blinds and liners.

PRIM® pH ou Rx
Automatic control of pH – or pH +, as well as chlorine concentration for the Rx (Redox) version.

Tempo UV®
Universal timed metering pump, injects active oxygen, chlorine or flocculant.

pH ≤150m³ **Rx Cl/mV** ≤80m³

pH ≤120m³ **Rx Cl/mV** ≤60m³

O₂ ≤150m³ **Cl** ≤80m³

Web interface: AvadyConnect®

Users can log in to their water treatment system at any time to monitor pH levels, check chlorine concentrations, receive notifications when supplies need to be changed, view past measurements, manage several accounts, and more. The web interface provides an easy, optimised way of controlling pool equipment remotely. www.avadyconnect.com.

PROpilot® pH et Rx pour électrolyseur à sel
Simultaneously regulates pH and chlorine. The volumetric alarm ensures that chemical containers never run dry. Features two two-in-one injector sensor holders, for horizontal or vertical installation.

pH ≤280m³ (private)
Rx Cl/mV ≤180m³ (public)

DUO pH® TURBOXY
Suitable for pools in private homes, hotels, residential complexes and holiday homes. Simultaneously regulates pH and chlorine levels (amperometric sensor, ppm display). Water temperature display, remote access to data and remote control via www.avadyconnect.com thanks to the web option. Features a two-in-one universal sensor holder.

pH 5 to 150m³ (private)
Cl ppm mg/l 5 to 90m³ (public)

PANpilot pH® Turboxy S20
Brings together the best in metering pump technology: peristaltic for pH and electromagnetic for chlorine (open amperometric sensor, ppm display). Remote access to data and remote control via www.avadyconnect.com thanks to the web option.

pH 5 to 220m³ **Cl ppm mg/l**

Physico pH® CLM
Simultaneously regulates pH and chlorine levels (closed amperometric sensor, ppm display).

Cl ppm mg/l 1 to 150m³

MasterBox®

This box contains all the electrical protection devices for pool equipment: pH and chlorine regulator, heating, filtration pump, booster pump, lighting, covers. Bluetooth or remote access (AvadyConnect).

DESIGN AND INNOVATION

We dedicate more than 10% of our annual sales revenue to research and development of products that meet the needs and requirements expressed by the market. Our goal is to make our products even more efficient and innovative whilst ensuring that they remain easy to install and use.

MADE IN FRANCE

All of our products are created, designed and manufactured in France, thereby guaranteeing top performance and quality. We have established close relationships with all our partners and thus benefit from their industrial experience and their skills in electronic, mechanical and hydraulic technologies, ensuring efficient and innovative working practices. All Avady products are manufactured at our head office. For optimum efficiency, our selected suppliers are all local companies.

SERVICES AND ADVICE

- Assistance with equipment selection
Our technical consultants draw on over 30 years of experience in water treatment to assist you in selecting the best equipment for your needs.
- Dealer training
We help our dealers increase their sales revenue, by providing sales and technical training for their staff and their customers.
- After-sales service within 24/48 hours of receipt in the workshop
We undertake to deal with all equipment received at Avady for after-sales service within no more than 48 hours.

All products are supplied with a complete kit.

* complies with the requirements of the French Regional Health Agency
