

**DOMINIQUE  
DUCOEUR**  
DIRECTOR OF  
AVADY

With some 30 years of experience in water treatment measurement and monitoring, Dominique Ducoeur applies his skills and know-how to devise and design the equipment best suited to automatic swimming pool water analysis systems.

“At AVADY, we draw on our proven experience to devise products with the capabilities needed and requested by individuals and professionals. We design equipment to simplify the daily life of pool owners and installers, while ensuring that our environmental impact is as neutral as possible.

Simplicity, reliability and responsibility are our watchwords.

# WATER TREATMENT WITH TOTAL PEACE OF MIND

AVADY devises, develops and assembles water treatment equipment that provides practical, responsible, unique and innovative solutions for all market sectors. We are committed to providing high quality, intelligent and technologically advanced equipment that is easy to use and efficient, while limiting the environmental impact.

## WEB INTERFACE AVADY Connect®

Users can log in to their water treatment system at any time to monitor pH levels: they can check chlorine concentrations, receive notifications when canisters need to be changed, view past measurements, manage several accounts, and more. The web interface provides an easy, optimised way of controlling pool equipment remotely.

[www.avadyconnect.com](http://www.avadyconnect.com)

## DESIGN AND INNOVATION

We dedicate more than 10% of our annual sales revenue to research and development of products that meet the needs and requirements expressed by the market. Our goal is to make our products even more efficient, innovative and responsible, while ensuring that they remain easy to install and use.

## MADE IN FRANCE

All of our products are created, designed and manufactured in France, thereby guaranteeing top performance and quality. We have established close relationships with all our partners and thus benefit from their industrial experience and their skills in electronic, mechanical and hydraulic technologies, ensuring efficient and innovative working practices. The production of AVADY devices is entirely carried out at the company's headquarters, close to the suppliers, which allows an optimal reactivity and efficiency.

## SERVICES AND ADVICES

- **Assistance with equipment selection**  
With 30 years of experience in water treatment, our technical advisors will help you choose the right equipment for your needs.
- **Distributor training**  
We help our distributors to develop their turnover through our commercial and technical training of their employees and customers.
- **After-sales service within 24/48 hours of receipt in the workshop**  
We undertake to deal with all equipment received at AVADY for after-sales service within no more than 48 hours.

## RESPONSABILITY

- Short circuit (providers and supplies)
- CSR-oriented company
- Development of products in line with ecological needs and emergencies

### POOLEasy® pH or Rx

Automatically regulates pool pH or chlorine levels.

The volumetric alarm ensures that chemical containers never run dry. Features a two-in-one injector sensor holder, for horizontal or vertical installation. Fits 50 mm and 63 mm diameter pipes.

### ChloriProtect®

Measures the chlorine concentration in pools.

Controls the salt chlorinator to avoid excess chlorine levels; protects equipment such as bar-supported covers, blinds and liners.

pH 1 to 150 m<sup>3</sup> Rx Cl/mV 1 to 80 m<sup>3</sup>

pH 1 to 280 m<sup>3</sup> (private) Rx Cl/mV 1 to 180 m<sup>3</sup> (public)

pH 1 to 150 m<sup>3</sup> (private) Cl ppm mg/l 1 to 90 m<sup>3</sup> (public)

### PANpilot pH® Turboxy S20

Brings together the best in metering pump technology: peristaltic for pH and electromagnetic for chlorine (open amperometric sensor, ppm display). Remote access to data and remote control via [www.avadyconnect.com](http://www.avadyconnect.com).

pH 1 to 220 m<sup>3</sup> Cl ppm mg/l

### PRIM® pH or Rx

Automatic control of pH - or pH +, as well as chlorine concentration for the Rx (Redox) version.

pH 10 to 120 m<sup>3</sup> Rx Cl/mV 10 to 60 m<sup>3</sup>

### Tempo UV®

Universal timed metering pump, injects active oxygen, chlorine or flocculant.

O<sub>2</sub> ≤ 150 m<sup>3</sup> Cl ≤ 80 m<sup>3</sup>

### PROpilot® pH and Rx for salt chlorinator

Simultaneously regulates pH and chlorine.

The volumetric alarm ensures that chemical containers never run dry. Features two two-in-one injector sensor holders, for horizontal or vertical installation.

### DUO pH® TURBOXY

Suitable for private pools, hotels, residential complexes and holiday homes.

Simultaneously regulates pH and chlorine levels (amperometric sensor, ppm display). Water temperature display, remote access to data and remote control via [www.avadyconnect.com](http://www.avadyconnect.com).

Features a two-in-one universal sensor holder.

Physico pH® CLM Simultaneously regulates pH and chlorine levels (closed amperometric sensor, ppm display).

Cl 1 to 1500 m<sup>3</sup>
