

2 in 1 probe holder

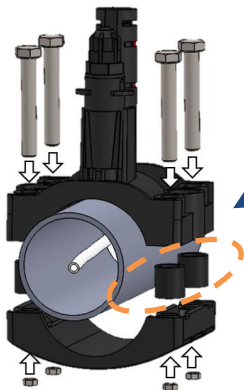

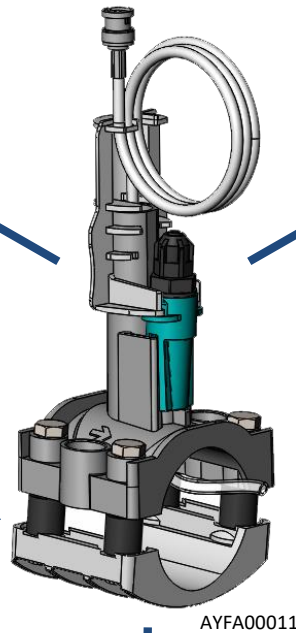

The exclusive 2-in-1 probe holder protects probes from impacts and facilitates the installation of the device.

Horizontal or vertical assembly.

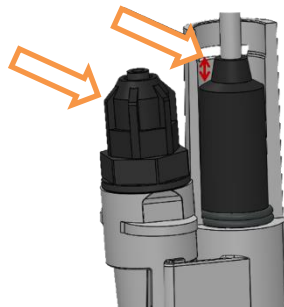

Sensor fully protected by the sensor holder tube.

Compatible with DN50 and DN63 pipes.

Supplied with a cap for easy winterization and maintenance.

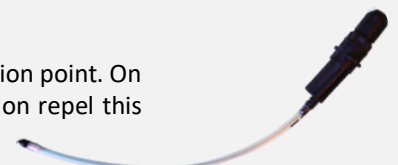

Easy installation with a single location for measurement and injection.

Associated product :

The CRISTALstop® injector (AYFA00006)

Once fitted on the 2-in-1 probe holder, it can be used to push back crystallisation at the injection point. On some site that usually have crystallization after 3 weeks, the CRISTALstop® injector installation repel this delay to 3 months.
