

Ensures safe chlorine production by the electrolytic salt cell and protects bar-supported covers

Private Pools

AYPO15009-

Scan to discover !

- Live display of the redox (chlorine) value in mV

Rx_{Cl/mV}

- Adjustable electrolytic salt cell cut-off limit

SIMPLE

- Optimum ease of use: one function per button.

SAFE

- The control output is protected against overloads by a 3,15A fuse (max. 700W).
- The difference in mV between the electrolytic cell start and stop is adjustable.

WARRANTY

- Device guaranteed for two years.

COMPLETE

- Delivered with a **complete kit** for quick and easy installation :

• Optimal dosage:

Control of the electrolytic salt cell to prevent over-chlorination
Protects equipment (e.g. bar-supported covers, blinds and liners.)
