## INNOVATIVE

- Enables the Turboxy® sensor to be installed in a bypass configuration if the hydraulic configuration is not optimal for correct operation of the sensor (sensor not supplied).
- Enables the DUO pH® Turboxy sensor to be installed on a DN63 pipe.
- Enables water flow in front of the Turboxy® sensor's impeller to be checked.

## VERSATILE

- Connection on DN50 and DN63 pipes.

## COMPLETE

- Delivered with a **complete kit** for quick and easy installation :

Compliant with the requirements of the ASF (French health agency)
